RE: RECOMPLETION
South Mattix Unit #33-G Sec. 15, T24S, R37E
South Mattix Unit #35-F Sec. 15, T24S, R37E

Gentlemen:

This will confirm your conversation with Evelyn Downs of this office concerning the above-referenced wells.

We need a well recompletion report covering the recompletion from the Fowler Paddock to the Fowler Upper Yeso Pool. Both wells have been approved for water injection so we need subsequent sundry notice on testing of the tubing casing annulus and when injection was commenced.

Also, sundry report on squeezing of the Paddock zone prior to recompletion.

Your monthly production report, Form C-115, shows injection into these wells but they are still listed in the Fowler Paddock Gas Pool. You should amend your C-115 report to show this injection as Fowler Upper Yeso since that is the zone that was approved for injection.

If you have questions, contact Evelyn Downs at (505) 393-6161.

Very truly yours,

OIL CONSERVATION DIVISION
