Dear Mr. Sexton:

Mobil Producing Texas & New Mexico, Inc. (MPTM) is submitting an application to drill the subject well in the Vacuum (Strawn) Field and complete it as an oil producer. However, we request permission to drill to a total depth of 11,800' and test the Vacuum (Atoka-Morrow) gas zone. Should MPTM find it necessary to complete this well in the Vacuum (Atoka-Morrow) at a future date, we understand that the Field Rules call for 1980' from end and 660' from side boundaries of a 320 acre proration unit, this well would then become a non-standard location and would have to be repermited.

Yours very truly,

*C. E. Smith for*
