Dallas, Texas 75247

Gentlemen:

The State Water Resources Department indicates that the Ogallala formation is present in Sections 31 and 32 of Township 5 South, Range 33 East, Roosevelt County, New Mexico, to a depth of approximately 250 feet. This will require that the surface casing be set through this fresh water sand to a depth of 300 feet.

If you have any questions regarding this, please feel free to call.

Yours very truly,

OIL CONSERVATION DIVISION

Jerry Sexton
Supervisor, District 1
